

U.S Environmental Protection Agency  
Washington, D.C.

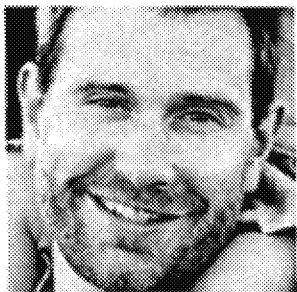

**ADMINISTRATOR SCOTT PRUITT**  
**Meeting with James Peterson**

**DATE:** 5/16/17

**EVENT TIME:** - 4:15PM-4:45PM

**LOCATION:** Administrators Office

**TOPIC:** Topic: To discuss technology advances and corresponding economics of FGD wastewater treatment as well as suggestions for modifications to the rule in order to save cost while mitigating environmental impact

**Biography:** James Peterson is the Co-Founder and CEO of Frontier Water Systems. Frontier Water is the pioneer and leading supplier of premium engineered equipment packages for high rate treatment of selenium, nitrate and metals from heavy industry. Building from a track record of applied performance, our equipment solutions are saving our customers millions of dollars, while providing best in class water to our lakes and rivers. Before co-founding Frontier Water Systems, Peterson worked as a regional manager of GE Water & Process technologies. He received his Bachelor of Engineering and Environmental Engineering from the University of Guelph.
